18/2/26

Day - 3

Block 1 - Aptitude

Ratio & proportion.

1) A : B = 3 : 5
B : C = 2 : 3 , A : C = ?

$\frac{3\times2}{5\times2}, \frac{2\times5}{3\times5} = \frac{6}{10}, \frac{10}{15}$

6 : 15 ⇒ 2 : 5

A : C = 2 : 3

2) ₹ 1000 in ratio of 2 : 3 : 5

2 + 3 + 5 = 10

$\frac{1000}{10} = 100$

2 × 100 = 200
3 × 100 = 300
5 × 100 = 500

∴ ₹ 200, ₹ 300, ₹ 500

3) 4 pens = ₹ 40

cost of 1 pen = 40/4 = 10

cost of 10 pens = 100

4) Boys : Girls = 3 : 2.
Total = 50

→ 2 + 5 = 5

→ 50/5 = 10

one part (Girls)

2 × 10 = 20

∴ 20 Girls

5)

A : B = 4 : 7

B = 21. A = ?

7 parts = 21.

one part = 21/7 = 3

A = 4 X 3 = 12.

A = 12.

Verbal ability:

1) Data structures makes the problem solving easier

2) Choosing wrong data structure may leads to poor performance

3) Performance in programming means how efficiently a program runs

Grammar correction.

1. He go to college daily

He goes to college daily

2. She don't like coding

She doesn't like coding

3. We was solving problems

We are solving problems

Block 3.
communication

strengths and weakness

One of my key strengths is that I am adaptive in nature. I can easily adjust myself in different situations and environment if it is needed.

Another strength of mine is determination. If I decide to do something and I am confident about it, I make sure I completed it no matter what.

Coming to my weakness, I tend to procrastinate at some times. Now, I am actively working on improving this. I have started setting small goals and following a daily schedule to manage my time better.
