8/03/26

Day 7

Block 1 (Aptitude).

Probability:

1) Probability of getting a head

HT ⇒ total outcome 2.

$P(H) = \frac{1}{2}$.

2) P(n > 4).

~~total~~ = {1, 2, 3, 4, 5, 6}

5, 6 > 4 ⇒ 2.

P(n > 4) = 2/6 ⇒ 1/3

3) P(R) Red ball

Total balls = 5 (3 Red + 2 Blue)

$P(R) = \frac{3}{5}$

4) Probability of getting two heads

S = {HH, HT, TH, TT} ⇒ 4.

Two heads = HH ⇒ 1

$P = \frac{1}{4}$

5) Probability of selecting a vowel from "ENGINEER" = 8 letters

vowels ⇒ EIEE ⇒ 4 letters

P = 4/8 ⇒ 1/2

Block 2 : Verbal

1) To manage hardware resources and provide services for computer programs.

2) It ensures efficient use of memory

3) It is the method of deciding which process runs at what time

Grammar correction :

1) He don't know operating systems
He doesn't know operating systems

2) She were learning data structures
she was learning data structures

3) They has solved the problem
They have solved the problem

Block 3

Internet

The Internet is a global network that connects millions of computers around the world

It helps us communicate, search for information and use online services

When we type a URL in a browser, the first step is DNS, Domain Name System. DNS converts the website name into an IP address.

Then, the request is sent to a server where the website is stored. The server processes the request and sends back the required data

Finally, the browser receives the response and displays the website on our screen.
