16/3/26

Day 1

Block 1

Aptitude (Percentages)

1)

Original number $= x$

Increases $-$ 20% of x $\quad 20\% = \frac{20}{100} \Rightarrow 0.2x$

$x + 0.2x = 120$

$1.2x = 120$

$x = 120/1.2$

$x = 100$

$\frac{120 \times 10}{1.2 \times 10} = \frac{1200}{12} = 100$

2)

Price increases $= 10000$

$\therefore$ Percentage Increase $= \frac{\text{Increase}}{\text{price}} \times 100$

$= \frac{10000}{50000} \times 100$

$= 0.2 \times 100$

$= 20\%$

3)

Percentage $= \frac{\text{Marks Obtained}}{\text{Total}} \times 100$

$= \frac{72}{90} \times 100$

$= 0.8 \times 100$

$= 80\%$

$\frac{72}{90} \times 100$

8×10

80%

4)

Increase $= 10000$

Percentage increase $= \frac{10000}{50000} \times 100$

$= 20\%$

5)

shirt price = 800

Discount = 25%

25% of 800

$\frac{25}{100} \times 800$

$\Rightarrow 200 \rightarrow$ Discount

800 − 200 = 600

∴ Final Price = ₹600.

Block -2.

Verbal

Reading Passage:

1) Technology

2) Artificial Intelligence, Machine Learning and Automation are the technologies mentioned in the passage

3) companies depend on data-driven decisions because it helps them analyze the data and make better business decisions

Grammar correction.

1) she dont understand the problem

she doesn't understand the problem

2) He have completed the task.

He has completed the task.

3) They was going to the meeting

They were going to the meeting

Block 3

Communication Practice.

Self - Introduction

I am Prajadhaneshini from Idappadi. I am currently pursuing B.E Computer Scienc and Engineering at Muthayammal Engineering College.

I have strong interest in developing web applications.

As the part of my learning I have worked in few projects. One of my projects is Placement Insights Dashboard which is built using MERN. The main goal this project is to visualize campus placements records. including Number of students

placed in a particular company, their department, year and visualize these data using charts.

My goal is to ~~[illegible]~~ get placed in a company and enhance my skills continuously
